# Architecture Diagram

### *1. Zoho Creator AI Application Generator Landing Page*

Zoho Creator homepage showcasing its AI and low-code platform for Indian enterprises. The page highlights how businesses can quickly build custom apps, featuring a clean gradient design, intuitive navigation, and a prompt generator for app creation.

### *2. Zoho Creator Sign in / Authentication Portal*

Zoho Creator sign-in page featuring multiple login options and a passwordless sign-in illustration. The left panel includes fields for email or mobile number and icons for Google, Facebook, LinkedIn, X, Apple, Microsoft, and Zoho login. The right panel promotes secure, one-tap access via OneAuth with a modern graphic of biometric authentication.

### *3. Zoho Creator User Dashboard*

Zoho Creator dashboard showing Akshaya's workspace. The interface welcomes the user and displays an application named “Approvix,” created on July 27, 2026. The sidebar organizes tools under Develop, Deploy, and Manage sections, while the top bar includes options to create new applications, view trial status, and upgrade the plan.

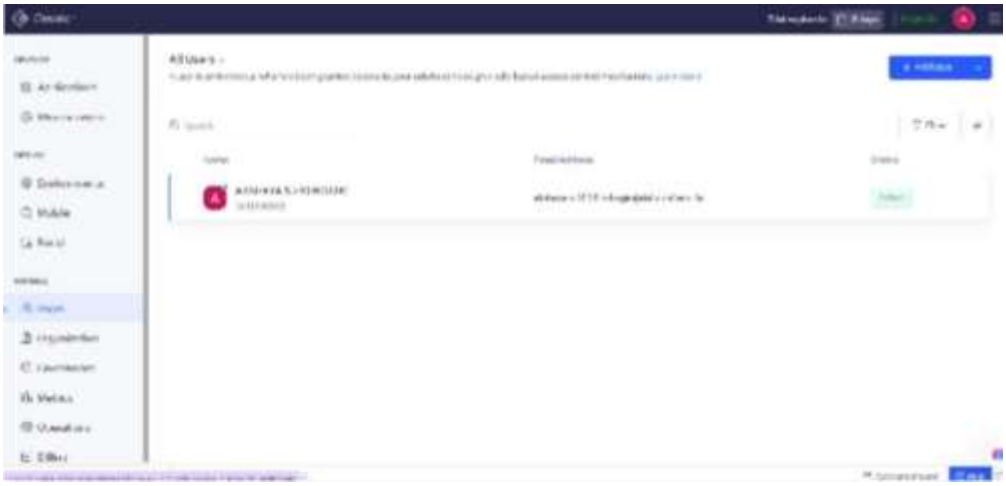

### *4. Multi Stage Environment Dashboard*

Zoho Creator “Environments” dashboard displaying deployment stages. The interface shows options for Stage and Production environments, both currently empty, with a prompt to add applications. The sidebar includes sections for developing, deploying, and managing apps, while the top bar offers version history, management, and publishing controls.

## *5. User Management and Role Based Access*

Zoho Creator “Users” management dashboard showing the list of users with access to the platform. The interface displays one active user, Akshaya S (Super Admin), along with their email address and status indicator. The sidebar organizes sections under Develop, Deploy, and Manage, while the top bar includes options to add users, filter results, upgrade the plan, and view trial expiry details.

## *6.Organization SettingsandProfileSetup*

Zoho Creator “Organization” settings dashboard showing company profile and preferences. The interface includes options to upload an organization logo and favicon, along with sections for contact information, super admin details, and preferences such as namespace and time zone.

2414010099

## *7. Metrics and Application Analysis Dashboard*

Zoho Creator “Metrics” dashboard displaying application activity insights. The interface shows sections for Applications accessed, Idle applications, and Daily average hits per application—all currently showing zero data. Charts for Application access trend and Usage by hit count indicate “No data available.”

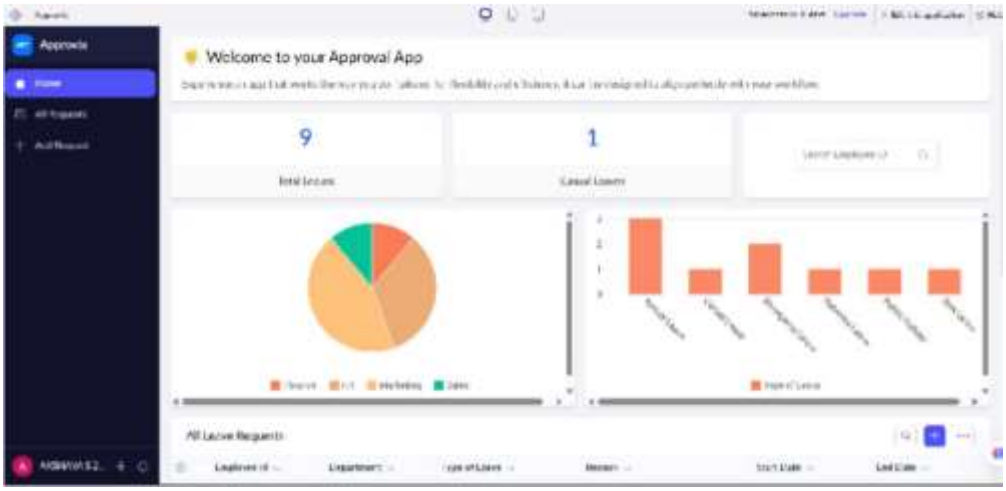

## *8. Billing and Subscription Management*

Zoho Creator “Billing” dashboard showing subscription details and trial status. The interface highlights that the trial ends in 8 days, with an option to upgrade the account. It displays plan details—1 user out of 10 and 1 app out of unlimited—and includes tabs for Subscription and Usage Details.

## *9. Live Custom Application Home Dashboard*

Zoho Creator "Approvix" dashboard for the Approval App. The interface welcomes the user and displays key leave statistics—9 total leaves and 1 casual leave. It features a pie chart showing departmental leave distribution and a bar chart comparing types of leave.

## *10. Detailed Data Report View (All Requests)*

Zoho Creator "Approvix" dashboard displaying the "All Leave Requests" section. The interface shows a structured table listing employee leave details, including Employee ID, Department, Type of Leave, Reason, Start Date, and End Date.

24140009

## *11. Request Adding*

Zoho Creator “Approvix” Approval Request form interface. The page allows users to submit leave or approval requests by entering details such as Employee ID, Department, Type of Leave, Start and End Dates, and Reason, with a highlighted “Creator tip” section providing guidance.

## *12. Create New Application Options*

Zoho Creator “Create New Application” interface offering multiple app creation options. The screen presents four choices—Create using Zia (AI-powered app builder), Create from scratch, Create from gallery, and Import from file.

24140 1009

### *13. Gen AI App Builder Prompt Screen*

Zoho Creator “App Builder” interface powered by GenAI. The screen features a minimalist design with a central prompt inviting users to describe their app requirements for AI-assisted creation, an attachment icon for supporting files, and a send button.
